PROFILE

Senior Frontend Engineer with over 4 years of experience specializing in building scalable, high-performance web applications. Expert in the React ecosystem (TypeScript, Next.js, Vite) and modern UI libraries like TailwindCSS and Shadcn. Proven track record of delivering complex projects at Simform Solutions and guiding junior developers. Passionate about clean code, web performance, and creating intuitive user experiences.

EDUCATION

2019 - 2022
GUJARAT TECHNOLOGICAL UNIVERSITY

- Bachelor of Engineering in Information Technology
- CGPA: 8.3

2015 - 2019
THE MAHARAJA SAYAJIRAO UNIVERSITY OF BARODA

- Diploma in Information Technology
- Percentage: 63%

SKILLS

- **Languages**: TypeScript, JavaScript (ES6+), HTML5, CSS3
- **UI & Styling**: TailwindCSS, Shadcn UI, Material UI, Ant Design, Headless UI, SCSS
- **Stack**: React.js, Next.js, Vite, Redux Toolkit, React Query/TanStack
- **Tooling & Quality**: ESLint, Prettier, Webpack, Storybook, Git/GitHub, CI/CD Basics
- **Performance**: Core Web Vitals, SEO Best Practices, Accessibility (WCAG)
- **AI Tools**: GitHub Copilot, Figma MCP, Lovable, Vercel v0
- **Design Tools**: Figma, Zeplin, Photoshop, GIMP

WORK EXPERIENCE

FEB 2022 - PRESENT : Simform Solutions, Ahmedabad

Sr. Frontend Engineer

- Architected scalable frontend systems using React and Advanced TypeScript, establishing a modular codebase that improved maintainability and accelerated feature delivery for enterprise clients.
- Standardized development workflows by integrating ESLint, Prettier, and Husky, enforcing strict code quality guidelines that reduced technical debt and streamlined code review cycles.
- Optimized application performance, resulting in faster load times and improved Core Web Vitals.

- Led multiple technical sessions on JavaScript best practices and modern AI tooling, upskilling the frontend team. Curated and posted regular engineering quizzes to drive engagement and improve collective problem-solving capabilities.
- Mentored junior developers and interns, assisting with skill development and project onboarding.

JAN 2021 - FEB 2022 : Self Employed

Freelance Frontend Developer

- Delivered pixel-perfect, responsive landing pages for diverse freelance clients, ensuring 100% adherence to WCAG accessibility standards.
- Portfolio Development: Designed and deployed my first personal website (abhisawant.me) to showcase my projects and understand the basics of web hosting and deployment.

AUG 2020 - JAN 2021 : Royalsoft Solutions, Vadodara

Frontend Developer (Contractor)

- Translated UI/UX design wireframes into high-quality, responsive code using HTML5, CSS3, and JavaScript.
- Optimized web applications for maximum speed and scalability, ensuring cross-browser compatibility across mobile and desktop devices.
- Collaborated with other developers to troubleshoot frontend-related bugs and layout issues.

K E Y P R O J E C T S

Enterprise Workflow & Delegation SaaS (FinTech / Governance)

React, TypeScript, Ant Design, Styled Components

- UI/UX Implementation: Engineered complex, interactive dashboards and dynamic form validations, ensuring a seamless user experience for delegation workflows.
- Design System: Implemented Styled Components to enforce a consistent visual language across the application, improving code maintainability and design scalability.
- Responsive Architecture: Implemented adaptive layouts to ensure full accessibility and visual integrity across a wide range of devices, from mobile screens to large desktop monitors.

Automotive Logistics & Supply Chain Dashboard (Logistics)

React, TypeScript, Redux Toolkit, Vite, AWS

- Presentation Layer: Built the frontend presentation layer using React and Ant Design, transforming raw shipment data into user-friendly, interactive tracking tables.
- Data Integration: Integrated backend API responses into UI components, ensuring accurate rendering of static shipment statistics for administrators and dealers.
- Code Quality: Utilized TypeScript to enforce strict typing across UI components, significantly reducing runtime errors and improving codebase readability.

Fractional Real Estate Trading Platform (PropTech / FinTech)

React, JavaScript, SASS, Webpack, Chart.js

- Component Development: Developed a library of reusable, interactive frontend components using React and Ant Design, which streamlined the creation of property listing pages.

- Styling Architecture: Implemented modular styling using SASS, ensuring design consistency and simplifying future style updates across the trading platform.
- Cross-Platform Compatibility: Ensured robust cross-browser compatibility and responsiveness, guaranteeing a consistent trading experience for users on all viewports, from mobile devices to 4K monitors.

AI-Driven Risk Management Dashboard (FinTech / SaaS)

Next.js, Tailwind CSS, shadcn/ui

- Performance Optimization: Conducted a comprehensive codebase audit to identify and remove dead code and redundant libraries, achieving a 50% improvement in application load times.
- Rapid UI Development: Owned the end-to-end UI implementation, translating high-level requirements directly into production-grade code without needing Figma mockups, significantly accelerating the release cycle.
- Modern Component Architecture: Utilized shadcn/ui and Tailwind CSS to build a lightweight, accessible, and easily maintainable component library for the core application.

FinTech Product Marketing Site (Marketing / Branding)

Webflow, Custom Animations

- Interactive Design: Developed a high-fidelity marketing website featuring complex, scroll-triggered animations to drive user engagement and visually explain complex product features.
- Brand Implementation: Executed the digital strategy for a major corporate rebranding, ensuring the new visual identity was successfully rolled out to potential customers.
- Rapid Delivery: Leveraged Webflow to deliver a pixel-perfect, animation-heavy marketing site on a tight deadline, allowing the core engineering team to focus on the main SaaS product.
